SUMMARY

Full-stack software engineer with experience building production-grade and real-time web applications. Skilled in scalable REST APIs, WebSocket-based systems, and high-performance frontends with modern UI/UX. Proven ability to solve complex challenges including real-time synchronization, AI integration, API refactoring, and deployment.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

2023 - 2027

- Tezpur University, Tezpur, Assam | CGPA: 7.28

TECHNICAL SKILLS

Languages & Frameworks: C++, TypeScript, React.js, Next.js, Node.js, Express.js

Technologies: RESTful APIs, WebSockets ([Socket.IO](#)), Zustand, MySQL, MongoDB, Git, Three.js

WORK EXPERIENCE

Software Engineering Intern | Indian Oil Corporation Limited (IOCL)

Dec'25 - Jan'26

- Developed full-stack Asset Management System managing enterprise assets with role-based access control for multi-tier user hierarchies
- Built RESTful APIs with Node.js, Express, and MySQL; designed normalized database schema with asset assignment workflows and audit logs
- Implemented dashboards with KPI tracking for asset usage, maintenance status, and lifecycle management using React and Recharts
- Resolved production issues including database migrations, API refactoring, and backend-frontend integration bugs
- Followed clean architecture with separated controllers, services, and routes for maintainable, scalable codebase

Frontend Developer | Bael Tea

Dec'24 - Jan'25

- Developed responsive web application from scratch using React, TypeScript, and Next.js with mobile-first design approach
- Implemented client-side routing, navigation architecture, and reusable component library

PROJECTS

Asset Management System | React, Node.js, Express, MySQL, Tailwind CSS | [Github](#)

- Developed role-based asset management platform with automated assignment logic and admin controls
- Built analytics dashboard for asset tracking, maintenance scheduling, and real-time status monitoring

AI Multiplayer Debate Platform | React, Node.js, Socket.IO, OpenRouter API, Zustand | [Github](#)

- Built real-time multiplayer debate system with synchronized state using Socket.IO
- Integrated AI-based judging to evaluate arguments and generate structured scoring and verdicts
- Link - <https://debate-arena-ruknaabh.vercel.app>

LEADERSHIP & ACTIVITIES

Hostel representative | Inter-Hostel Sports & Cultural Events

- Coordinated team participation and event logistics across multiple competitions
